

CavKit® Cavity Slider Kit

By EZ Concept®

A flush finish system that transforms standard cavity sliders into trim-free cavity sliders

CavKit® Cavity Slider Kit

CavKit® transforms standard cavity sliders into architrave-free, square set cavity sliders with the ability to completely conceal the door.

Manufactured by Studco Building Systems, CavKit® is part of the EZ Concept® range of interior solutions and harmoniously complements the EzyJamb® door jamb system, creating a contemporary and architectural dimension to any project. Transform standard cavity sliders into architrave free cavity sliders with CavKit; a flush finish system that trims and caps the plasterboard edges around the door penetration to create a cavity slider that can be hidden when open and provide privacy when closed. An optional custom made closer cap can be produced to suit any specification for total privacy, increased climate control and improved acoustics.

Features & Benefits

Save Time

Fast, efficient install

Contemporary Style

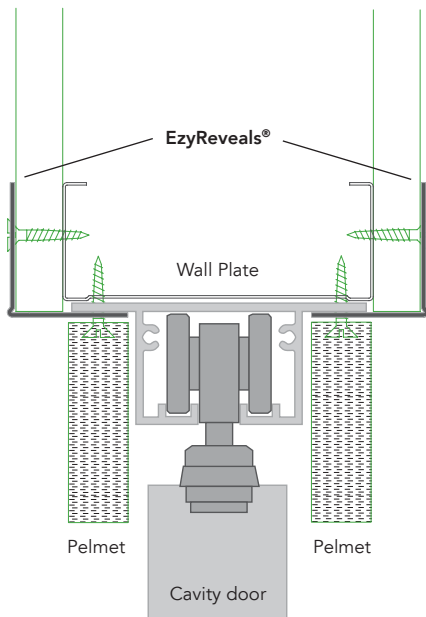

Create a flush look

Paintable Surface

Ready for fast, easy finish

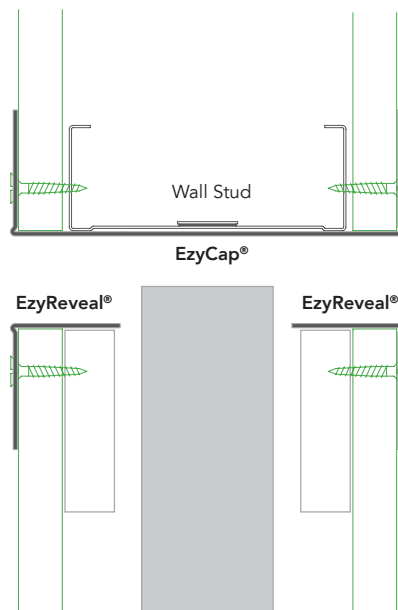

Head Detail

Please note: CavKit Cavity Slider Kits require pelmets for roller carriage access. Ask us about our zero clearance cavity units without pelmets.
