

METINNO[®]

2000 Series

Frontline Glazing System

- Consistent 32mm profile
- Frontline glazing design
- Practical, cost efficient and aesthetically pleasing
- Creates additional space for window furnishings
- Available in natural anodised or mill finish for powder coating to any colour
- Completely interchangeable with the 1000, 2000D and 5000 Series

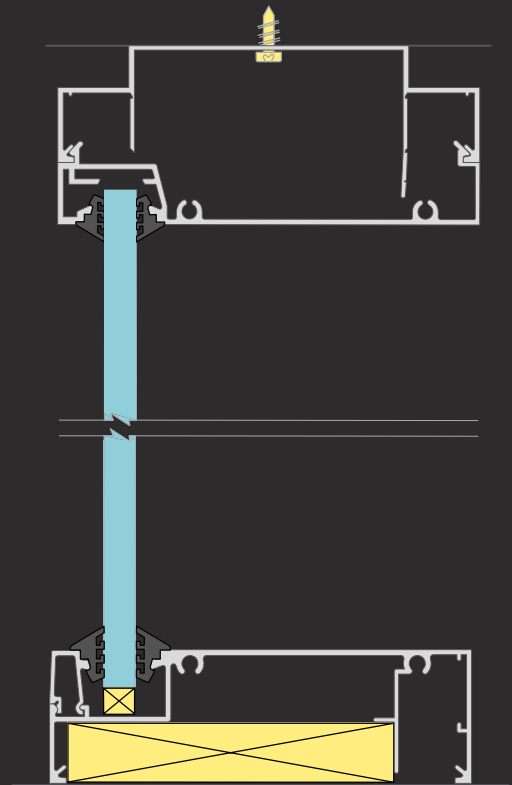

Create a distinguished office environment

The Metinno 2000 Series system will create a distinguished office environment when utilised. The feature of this system offers frontline glazing office panels while maintaining the 32mm profile design.

Create a continuous line throughout your space and improve aesthetics with a subtle aluminium border around the glass on the front side. Frontline glazing allows additional space on the other side for window furnishings or alternatively provides extra room within the space, increasing the net lettable area of an office.

There are unlimited designs that can be created when integrating the Metinno 2000 system with other systems like the Metinno 1000, 2000D or 5000 systems. A combination of frontline and double glazed panels can be constructed while still maintaining a consistent detail to one side.

2000 Series

Create consistent lines with frontline glazing

The innovative Metinno 2000 Series aluminium partitioning system is designed with a 32mm profile to create a continual line, even when integrated with other complimentary systems. The components of this system are interchangeable with either the Metinno 1000, 2000D or 5000 systems creating unparalleled scope to construct an outstanding partition layout.

With its frontline glazing profile, extra space is created to allow for window furnishings while generally creating a sense of more room within the space while keeping all components in line for a superior finish.
