# METINNO®

3000 Series

Offset Glazing System

- Integrate with 64mm, 76mm and 92mm stud and 13mm plasterboard
- Allows for integration with high level acoustic walls without compromising style
- Pair with Metinno 1000, 2000, 2000D and 5000 systems for unlimited options

- Consistent 32mm profile with offset glazing
- Works with 92mm cavity allowing support columns to be contained neatly within the walls
- Available in natural anodised or mill finish for powder coating to any colour
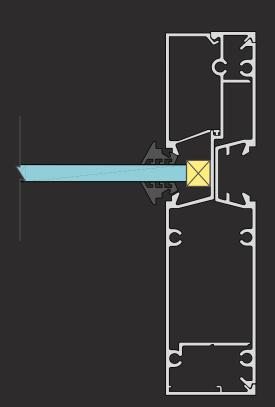

Consistent elegance with offset glazing

When looking for a system that integrates high level acoustic walls into office partitioning without compromising style, the Metinno 3000 system is the superior solution. With its ability to maintain a consistent 32mm profile, the Metinno 3000 system can be applied to any application where a 64mm, 76mm or 92mm stud is used.

Typical applications are:
- 92mm stud and 2 layers of 13mm plasterboard
- 76mm stud and 3 layers of 13mm plasterboard
- 64mm stud and 4 layers of 13mm plasterboard

Like all Metinno Aluminium Partitioning Systems, all sections are designed to allow selected sections to snap and lock together for simple assembly for the required finish. The Metinno 3000 system is completely interchangeable with the 1000, 2000, 2000D and 5000 systems.

3000 Series

Accentuate windows with a deep offset frame

The Metinno 3000 system integrates with 92mm steel studs whilst maintaining a quality profile throughout.

With Metinno Aluminium sections designed for fast, clip-together assembly, individual components fit together to achieve a desired look or function during construction e.g. the 3001 Main Frame and 3004 Glazing Adaptor forms a mullion.
