

METINNO®

5200 Series

Centreline Heavy Duty Glazing System

- Heavy duty 50mm profile with centre glazing
- Designed for high-use areas
- Suitable solution for all internal commercial and domestic applications
- Suits electric striker installation requirements
- Integrates with Metinno 5000 Sliding Door System
- Designed for 64mm steel stud and 13mm plasterboard

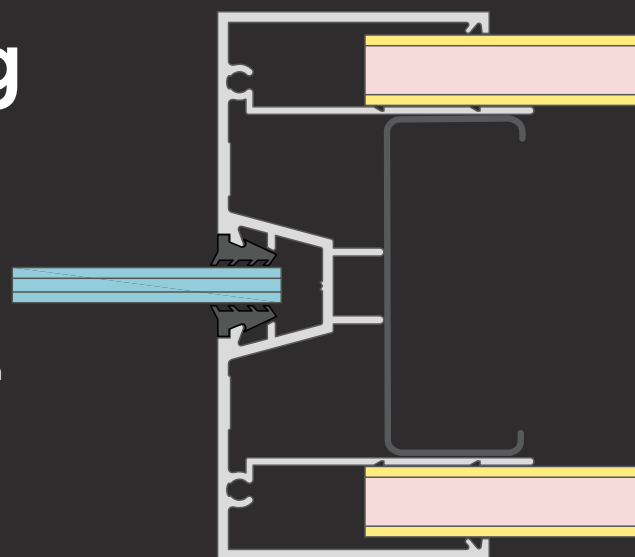

A partitioning system achieving strength and security

For a heavy duty alternative in all internal commercial and domestic applications, the Metinno 5200 system with its 50mm profile is the ideal solution. Designed to match the shop-front look, overcome the difficulty of installing standard sections into plasterboard partitions. The main frame's integrated fins prevent the additional costs of "flushing" plaster beads to the back of the door frame.

The Metinno 5200 system is ideal for apartments, hospitals, schools and more, creating a high-security option where there may be multiple tenancies or for high-use areas where longevity is key.

With its wider profile, the main frame section can be used as a receiving stile in the Metinno 5000 sliding door system and suits electric striker installation requirements.

5200 Series

Heavy duty centreline design for high-use areas

The Metinno 5200 centreline heavy duty glazing system is suitable for 64mm steel stud where window frames are constructed within plasterboard partitions. Improving efficiency and aesthetics where a heavy duty application is necessary, this system answers the practical needs of a variety of high-traffic spaces.

With its centreline glazing design, materials are perfectly balanced achieving a high quality and aesthetically pleasing finish.
