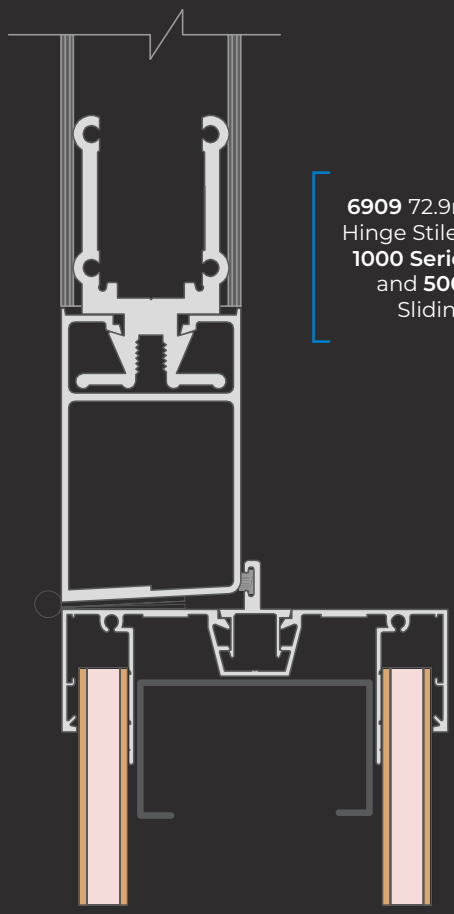
Popular for it's customisation & seamless integration

The Metinno 6000 system aluminium hinged door has been designed and is custom-manufactured to suit your specifications and requirements for a modern look and feel.

It focuses on the same sharp lines and small radii that are achieved in the Metinno 5000 system design. The Metinno 6000 system integrates seamlessly with other Metinno partition suites giving designers the ability to maintain a consistent architectural look throughout all door and partition applications.

It works with almost any door hardware and can be manufactured to suit a standard swinging door key-lock or an automatic door opening system with an electric strike. Achieve the desired look by selecting a natural anodised or mill finish that can also be powder coated to any colour.



6909 72.9mm Narrow Hinge Stile paired with **1000 Series** Partition and **5000 Series** Sliding Door

6000 Series

Pair with any partition series & desired door hardware

The Metinno 6000 system is available in both wide and narrow hinge stile options and can also accommodate various seal options. With it's strong and light construction, this hinged door system accommodates most modern door hardware – including electric door strikes.

All hinge stiles are reinforced to support hinge screws ensuring strength in design and construction for a superior finish.
