# METINNO®

7000 Series

Offset Glazing System

- Consistent 32mm profile
- Used in conjunction with the Metinno 1000 Series
- Integrates with 76mm steel stud & 13mm plasterboard
- Available in natural anodised or mill finish for powder coating to any colour

METINNO®
7000 Series

Slimline & stylish offset glazed partitioning

When designing a space that has multiple rooms, particularly when they're in a continual line yet all have different functions and properties, the Metinno 7000 system is a superior solution. Perhaps two rooms next to each other both require different stud sizes? The challenge to allow for this while keeping glazing in-line for a high quality finish is simple due to the design of this section that allows for three stud sizes.

Typical applications are:
- 76mm stud and 2 layers of 13mm plasterboard
- 64mm stud and 3 layers of 13mm plasterboard
- 51mm stud and 4 layers of 13mm plasterboard

For the perfect combination of functionality and consistent style, the Metinno 7000 system is the ideal aluminium partitioning solution.
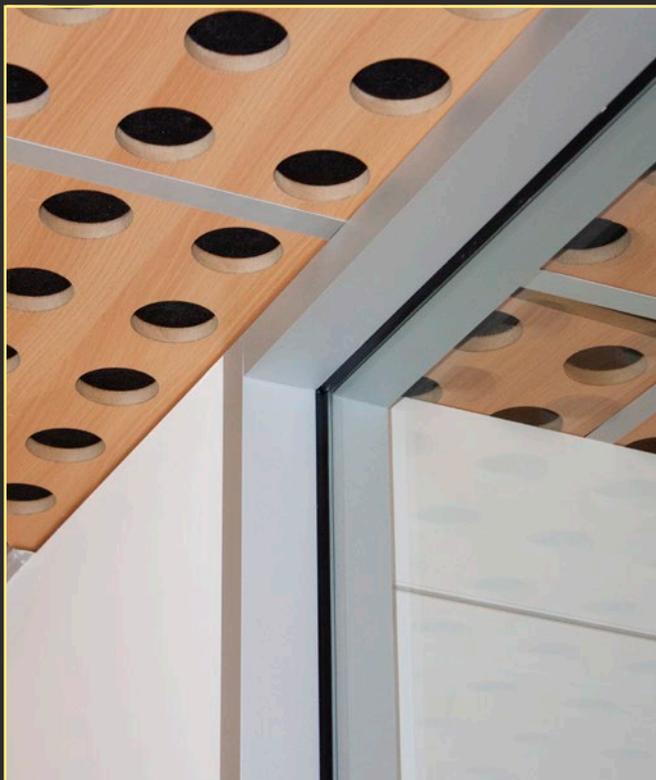

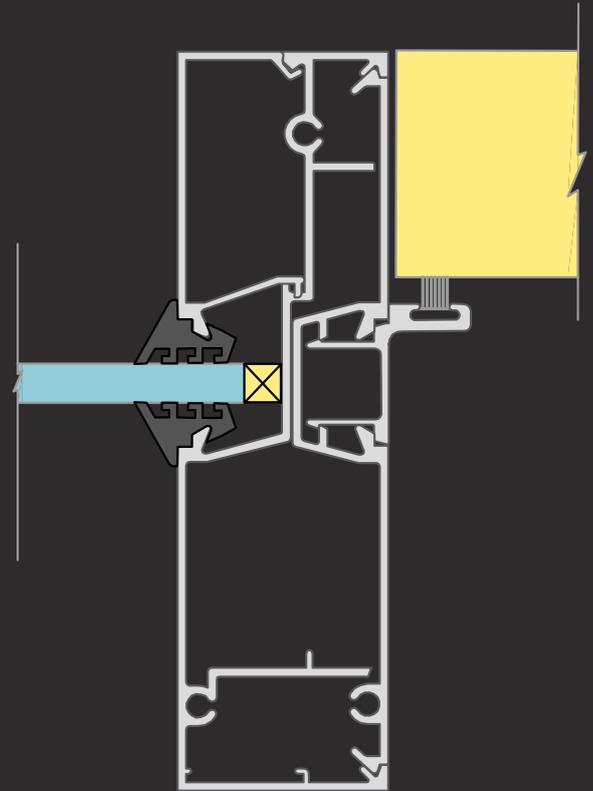

7000 Series
Create consistent lines with a slim profile

The Metinno 7000 system is designed for 76mm steel stud with a slightly offset glazing position. This allows the components to work alongside other Metinno Aluminium Partitioning systems while ensuring the continuation of glazing position throughout the space – particularly in the case of multiple offices being situated in a continual line.

Similar to the Metinno 3000 system, the Metinno 7000 system has an available capacity to integrate with varying sized steel studs and 13mm plasterboard.

ALUMINIUM PARTITIONING SYSTEMS

SECTION	CODE	DESCRIPTION	FINISH* & LENGTH	CONNECTS WITH
	7001	Main Frame	NA 5.5m	1012, 1013, 1014, 1015, 7004
