

Durafloor®

Flooring

Durafloor® provides one solution for substrate in interior wet areas such as bathrooms and laundries, as well as a range of exterior applications such as balconies and verandahs.

Its innovative tongue-and-groove joint eliminates the need for blocking, simplifying the installation process and speeding up the job. It is an excellent alternative to particle board or plywood.

Durafloor® is also perfect for use on balconies, verandahs, sundecks, and, when premium quality is essential, as a total floor solution.

Features and benefits

- Can be installed using traditional gun-nailing methods for efficiency.
- Compatible tongue and groove with particle board flooring.
- Fast installation, reducing install costs.
- Provides a solid, durable surface that feels more stable and secure underfoot compared to timber-based sheet flooring.
