

Duragroove®

Exterior facades

Duragroove® is a highly versatile, vertically grooved panel designed to add striking visual appeal to any project. Its sleek, modern design enhances contemporary spaces, and the option to mix and match profiles allows for endless creative expression.

Produced in large sheets across a variety of sizes, Duragroove® features a shiplap join for a seamless appearance and quicker installation. With four unique profiles, it's easy to achieve the perfect look:

- **Narrow:** 100mm between grooves.
- **Wide:** 150mm between grooves, with an enhanced groove width for added visual appeal.
- **Extra Wide:** 400mm between grooves, with an enhanced groove width for added visual appeal.
- **Wide Woodgrain:** 150mm between grooves, featuring a natural woodgrain texture and an enhanced groove width.

Features and benefits

- Excellent choice for long wall spans, offering large panel sizes that cover more square meters per sheet.
- It's efficient design reduces installation time while delivering a clean, modern finish.
- Acrylic-sealed panels improve paint adhesion and finish.
- Quick to install — no need for taped and filled joints.
- Panels resistant to termites, air, steam, salt and sunlight.
- Complies with BAL-40 as required in AS 3959 — Construction of buildings in bushfire-prone areas.
