

mastashield can be used in residential and commercial applications.

mastashield

mastashield is standard plasterboard made from a core of gypsum sandwiched between two layers of heavy duty recycled paper. The face paper is coloured ivory ready for paint or wall paper finish.

application

mastashield is an internal wall and ceiling lining suitable for residential and commercial applications. **mastashield** is usually installed over a timber or steel frame and can also be installed over a masonry wall.

installation

mastashield is usually installed using the 'Fastener and Stud Adhesive Method'. It may also be installed using the 'Fastener Only Method' or 'Masonry Adhesive Method'. Refer to the Siniat Plasterboard Installation Guide for complete installation instructions.

key benefits

- economical light weight construction
- available in a range of sizes including long sheets to minimise joints
- certified for use in Green Star projects
